

## **Publishing wizards to the Gallery using the drive time engine (Alteryx 10.0 and earlier users)**

This note is to alert end users of Alteryx 10.0 and earlier versions of an issue when publishing wizards to the Gallery using the drive time engine (Guzzler) “Most Recent Vintage” speed profiles selections. You may receive the following error messages –

Example 1:

Example 2:

“TomTom XX – Most Recent Vintage” drive time data may appear more than once (XX refers to the country, i.e. UK)

Example 3:

Selecting the Trade Area tool and selecting one of the drive time datasets may result in a tool error, “TT\_UK\_Q1\_2015\_SPEED\_PROFILES” is unlicensed

## **Workaround**

Upgrading to Alteryx 10.1 via this [link](#) will resolve this issue. If end users are unable to upgrade, selecting a specific drive time engine speed profile dataset instead of choosing “Most Recent Vintage” will allow end users to upload wizards to the Gallery.
